PROFESSIONAL SUMMARY

Applied AI / AI Systems Engineer specialising in production LLM and multi-agent systems for enterprise decision workflows. Experienced designing agent orchestration platforms, RAG pipelines, and observability-driven AI infrastructure across regulated domains including insurance and healthcare. Delivered measurable impact including **95% underwriting workflow reduction** and **$15.79M projected healthcare cost savings** through deployable systems built with FastAPI, GCP, and modern LLM frameworks

SKILLS

Programming & Development: Python (pandas, NumPy, scikit-learn) · FastAPI · REST APIs · SQL · TypeScript · Docker · CI/CD
AI / Machine Learning: Large Language Models (LLMs) · Retrieval-Augmented Generation (RAG) · Multi-agent systems · Agent orchestration · Semantic search · Embeddings · PyTorch · TensorFlow · Weights & Biases (W&B) · MLflow
AI Frameworks & Orchestration: OpenAI Agents SDK · LangChain · LangGraph · AutoGen · MCP · Pydantic · AsyncIO
Data & Infrastructure: Vector databases (FAISS, ChromaDB, Pinecone) · PostgreSQL · Redis · GCP Cloud Run

MAJOR PROJECTS

BHSI Risk Classification System — APR 2025 – JUL 2025

FastAPI, React, GCP, BigQuery, Gemini

- **Led a 6-person team and collaborated with BHSI underwriters** to build a multi-source underwriting intelligence platform orchestrating **11 specialised retrieval agents**, reducing D&O risk review time from 4–6 hours to <2 minutes **(~95% efficiency gain)**
- **Engineered hybrid risk-classification pipeline** combining rule-based keyword filtering with **Gemini-powered LLM analysis**, implementing structured JSON outputs and fallback routing to ensure **auditable underwriting decisions**
- **Deployed cloud-native full-stack system** (FastAPI + React on GCP) with Docker CI/CD and BigQuery observability, exposing real-time risk scoring APIs for underwriting workflows

Autonomous Multi- Agent Orchestration Platform — NOV 2025 – FEB 2026

Python, OpenAI Agents SDK, MCP, Gradio, SQLite

- **Developed autonomous agent system** orchestrating **6 MCP servers and 44 agent tools**, implementing an **agent-as-tool architecture** with async scheduling, LibSQL-backed knowledge graph memory, and market-aware task execution
- **Built observability and monitoring framework** integrating OpenAI TracingProcessor with SQLite event storage and a Gradio dashboard for real-time P&L tracking and agent activity analysis

Discharge Summary Copilot — APR 2025 – JUN 2025

GPT-4, Azure AI Search, React, Flask

- **Prototyped clinical documentation copilot** using GPT-4 and RAG retrieval to generate discharge summaries, reducing drafting time by **~80% across 10,000 synthetic patient records**
- **Designed secure RAG pipeline** with Azure AI Search and Human-in-the-Loop validation to support HIPAA/GDPR-aware medical documentation workflows

EDUCATION

IE SCHOOL OF SCIENCE AND TECHNOLOGY — **MADRID, SPAIN**
Master in Computer Science and Business Technology — SEP 2024 - JUL 2025

- Leadership: Class Representative, Community Engagement Rep, Tech & Innovation Club Events Officer (2025)
- Modules: Generative AI, Machine Learning & Artificial Intelligence, Deep Learning, NLP, MLOps, Cloud Foundations

UNIVERSITY OF BRISTOL — **BRISTOL, UNITED KINGDOM**
Bachelor of Science, Management — SEP 2017 – JUL 2020

- Modules: Project Management, Consultancy Project, The Digital Economy, Strategic Finance

PROFESSIONAL EXPERIENCE

HARGREAVES LANSDOWN *(WEALTH MANAGEMENT & FINANCIAL SERVICES)* — **BRISTOL, UNITED KINGDOM**
Financial Advisory Intern — JUN 2022 – JUL 2022

- Supported advisory risk review workflows across ISA, SIPP, and fund portfolios, improving data accuracy and compliance alignment within regulated financial processes
- Analysed client suitability questionnaires and call-monitoring data to identify workflow inefficiencies and presented findings to executive stakeholders
